

### Backflow Assembly Tester Resource List

Please be advised that only test results from testers that meet certain minimum requirements will be accepted . The list that is provided is not an endorsement of any firm, nor is it a guarantee/warranty of their work. This list is provided to our customers without any obligation on behalf of the customer to use their services. We have no financial interest in any of the firms listed as testers. In order to be included on this list, a tester must demonstrate certification from a credited association as a backflow prevention assembly tester, and certification/calibration of their testing equipment. The list is non exclusive, so there may be firms that meet these requirements that are not on the list. We reserves the right to include or remove any tester from this list without notice or cause. The list is provided to the customer merely as a service to identify testers who meet these general requirements.

We encourage all customers to report any complaints they may have concerning testers. We are not in a position to resolve disputes, as there is no representation as to the quality of work; however, we may review such complaints in deciding whether to keep a firm on the list or review their test results.
